FRAMEWORK AGREEMENT FOR MEMBERSHIP OF THE ISBE NETWORK

In Madrid, on [DAY] of [MONTH] [YEAR]

GATHERED

On the one hand, [NAME OF THE MANAGING ENTITY], a legal entity incorporated under [private/public] law, in accordance with the laws of Spain, with its [registered] office at [REGISTERED OFFICE], holding Tax Identification Number [NIF], and registered, where applicable, in the [RELEVANT PUBLIC REGISTRY] under number [REGISTRATION NUMBER], represented herein by Mr/Ms [REPRESENTATIVE], in their capacity as [POSITION], with sufficient powers to sign this Framework Agreement.

And on the other hand, [NAME OF ADHERING ENTITY], a legal person incorporated under [private/public] law, in accordance with the laws of [Member State of the European Union or the European Economic Area], with its [registered] office at [ADDRESS], holding tax identification number or equivalent [NIF/VAT/ID] and [registered in the applicable public registry in its jurisdiction under number [REGISTRATION NUMBER] / established or recognised by [LAW / ADMINISTRATIVE ACT / OTHER AUTHORISING DOCUMENT]], hereby represented by Mr/Ms [NAME OF REPRESENTATIVE], in their capacity as [POSITION], with sufficient powers to sign this contract and with the email address [REPRESENTATIVE'S EMAIL] for the purposes of notifications (hereinafter, the "**Adhering Entity**").

Both parties, hereinafter jointly referred to as the "**Parties**", acknowledge that they have the necessary and sufficient legal capacity and authority to enter into contracts and assume obligations in the capacity in which they act, in particular to formalise this Framework Agreement for Membership of the ISBE network. Mutually recognising such capacity, the parties,

DECLARE

I. That ISBE is a national permissioned public blockchain infrastructure, whose explicit governance and tiered participation system ensure a balance between the openness of the ecosystem and the requirements of security, resilience and legal compliance.

II. That the ISBE network operates under a public-permissioned model, which means that, whilst it is an open and collaborative infrastructure, access to certain functionalities is restricted to authorised participants according to their participation level (the "**Participation Level**"). The ecosystem is structured into the following Participation Levels, each of which is set out in the relevant annex to this Framework Agreement:
   a. Basic;
   b. Observer;
   c. Developer;

d. Execution Node Operator; and
e. Consensus Node Operator.

III. Each of the aforementioned Participation Levels has its own set of rights, operational capabilities and obligations within the ISBE network. The Participation Levels are independent of one another, with no hierarchy or mandatory progression between them; a Adhering Entity may subscribe to one or more Participation Levels simultaneously, provided that it fully complies with the obligations associated with each and respects any required functional segregation, particularly between technical and infrastructure roles. Multiple membership is voluntary and, under no circumstances, mandatory.

IV. That, in order to preserve the neutrality, security and federated nature of the ISBE network, the accumulation of Participation Levels that may compromise these principles may be subject to conditions, limited or, where appropriate, revoked by the competent supervisory or governance body of the Managing Entity (as defined below), by means of a reasoned decision, based on objective, transparent and non-discriminatory criteria and in accordance with the ISBE Policies, this power acting as a mechanism to prevent concentrations of power or infrastructure capture.

V. That the legal relationship between the Adhering Entity and the Managing Entity is structured through the following contractual framework, with the Managing Entity acting as the sole contractual counterparty to the Adhering Entity and as the body responsible for the administration and coordination of the ISBE network, in accordance with the decisions of its governance bodies:

- By signing this Framework Agreement for membership of the ISBE network, which establishes the general legal framework, the mandatory ISBE Policies and the common liability regime applicable to all members of the network.

- By signing, as an integral part thereof, at least one of the participation level annexes (the "**Role Annexes**"), each of which governs the specific regime applicable to the corresponding Participation Level.

  The Adhering Entity's accession to a Role Annex shall take place: *(I)* automatically, in the case of the Basic and Developer Levels, once the application has been formalised through the channels enabled by the Managing Entity and the minimum checks set out in the ISBE Policies have been verified, without the need for an individual review process; and *(II)* for all other Participation Levels, only once the requirements applicable to the relevant Participation Level have been met and following review and approval by the Managing Entity, in accordance with the application procedures established by ISBE's governance.

Membership of ISBE is not permitted solely through the signing of the Framework Agreement without the simultaneous assumption of at least one Participation Level.

VI. That, having reached an agreement regarding the Adhering Entity's collaboration within the ISBE network as set out in the foregoing, the Parties hereby formalise this **FRAMEWORK AGREEMENT FOR MEMBERSHIP OF THE ISBE NETWORK** (the "**Framework Agreement**"), which shall be governed by and subject to the following,

PROVISIONS

FIRST.— PURPOSE

1. The purpose of this Framework Agreement is to establish the general legal framework for membership and participation in the ISBE network and the legal relationship between the Adhering Entity and the Managing Entity, a framework which applies to any organisation holding the status of Participant, regardless of the Participation Level(s) it assumes.

2. The specific rights, operational capacities, limitations and obligations of each Participation Level are set out and specified in the corresponding Role Annexes which, where applicable, the Adhering Entity shall sign in its capacity as a Participant, and which form an integral part of this Framework Agreement and supplement it.

3. The signing of this Framework Agreement alone does not confer on the Adhering Entity the status of Participant in the ISBE network. To acquire such status, it will be necessary, in all cases, to simultaneously sign the Framework Agreement and at least one Role Annex relating to one of the available Participation Levels, at which point the Adhering Entity shall be subject both to the general provisions of this Framework Agreement and to the specific provisions of the signed Role Annex(es).

4. The subsequent adoption of new Participation Levels by the Adhering Entity shall require the signing of the corresponding additional Role Annexes and prior verification by the Managing Entity of compliance with the applicable requirements in each case, in accordance with the ISBE Policies. The termination of a specific Role Annex shall not affect, unless expressly agreed otherwise or unless it is the sole Role Annex, the validity of this Framework Agreement or the remaining Levels of Participation that the Adhering Entity maintains in force.

SECOND.— DEFINITIONS

For the purposes of this Framework Agreement, the following terms shall have the meanings set out below:

- "**ISBE**": Acronym for *Infraestructura de Servicios Blockchain de España* (Spanish Blockchain Services Infrastructure), a public-permissioned blockchain network promoted by public administrations and private entities, aligned with European guidelines on interoperability and digital trust. It comprises a set of networks (base network and Use Case networks, amongst others) designed to support applications with various levels of openness and regulatory requirements.

- "**Managing Entity**": The entity responsible for the operational, technical and governance management of the ISBE network, authorised to enter into this Framework Agreement on behalf of the network. It exercises the relevant administrative faculties, including the admission of participants, monitoring compliance with policies and the eventual exclusion of participants for non-compliance.

- "**ISBE Policies**": A set of internal policies governing various aspects of the ISBE network and its ecosystem, approved by the Managing Body in the exercise of its governance functions. Some of these policies apply internally to the Managing Entity and the governing bodies of ISBE, whilst others are mandatory for Adhering Entities in general or for specific Adhering Entities depending on their Participation Level or Levels. The current version of the ISBE Policies and their scope of application shall be kept up to date and made available via the ISBE portal or other channels designated for this purpose, without prejudice to the specific indication of applicable policies set out in the tables included in each Role Annex. The procedure for the approval, amendment and precedence of the ISBE Policies over this Framework Agreement shall be as provided for in Clause Seven. The ISBE Policies which, according to the information in force at any given time, are applicable to the Adhering Entity shall be deemed incorporated into this Framework Agreement by reference and shall be binding upon the Adhering Entity within the scope of its participation in ISBE.

- "**Participant**": A legal entity that has signed this Framework Agreement and, simultaneously or successively, one or more Role Annexes relating to the envisaged Participation Levels, having passed the *Know Your Business* (KYB) verification process and met the other requirements set out in the ISBE Policies.

- "**Basic**": A Participation Level that grants the Adhering Entity a set of limited and non-intrusive operational capabilities on the ISBE network, enabling it, under the terms specified in the ISBE Policies: **(i)** to access the private area and the ISBE portal; **(ii)** to use pre-configured smart contract libraries and wizards in non-programmatic and supervised deployment modes; and **(iii)** to use the basic services that ISBE makes available to its Participants (including, where applicable, notarisation and evidence registration services); **(iv)** to use, where applicable, the controlled gas acquisition mechanisms that ISBE makes available to this Participation Level (faucet or other equivalents); and **(v)** receive administrative communications and functional support via the ISBE private area and the designated HelpDesk channels, without being authorised to operate its own nodes or to interact directly with the blockchain beyond the flows enabled and supervised by ISBE. The Adhering Entity may assume this Participation Level once it has **(i)** signed **Annex I – Specific Conditions of the Basic Level** and **(ii)** successfully completed the general internal admission procedure set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and other applicable ISBE Policies.

- "**Observer**": A Participation Level aimed at Participating Entities with supervisory, control, audit, research or institutional interest functions, which allows them to audit and monitor the ISBE network without the ability to intervene operationally in it or issue transactions. This access comprises read-only exploration of the state of the ISBE network (blocks, transactions, metrics and aggregated states), as well as the use of advanced observability tools made available by the Managing Entity (monitoring dashboards, scorecards and operational logs), which allow the Observer to analyse the system's

behaviour, its stability and the temporal evolution of its main indicators, without the power to issue transactions or modify the network status, and in accordance with the terms and scope set out in the ISBE Policies. The Adhering Entity may assume this Participation Level once it has ***(i)*** signed **Annex II — Specific Conditions of the Observer Level** and ***(ii)*** successfully passed the internal assessment and suitability procedure applicable to this Participation Level, in accordance with **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and the other ISBE Policies.

- "**Developer**": A Participation Level that enables the Adhering Entity to design, develop, deploy and maintain Use Cases and Smart Contracts on the ISBE networks, subject to passing the technical and regulatory approval and compliance processes set out in the ISBE Policies. At this Participation Level, the Adhering Entity may, in addition to the functional capabilities associated with the Basic Level where compatible: ***(i)*** deploy its own Smart Contracts that have passed the approval tests set out in **Policy ECO1020 – Policy on the Management of Use Cases and SCs**; ***(ii)*** use the *Blockchain-as-a-Service* infrastructure services that ISBE makes available to Developers or which, where applicable, are provided to them by third-party Execution Node Operators; and ***(iii)*** request the inclusion of their solutions in the ISBE catalogue of services and applications, subject to the terms and limits defined in the ISBE Policies. The Developer shall not be authorised to operate its own Execution Nodes or to expose node infrastructure under its control on the ISBE network, unless the Adhering Entity has additionally assumed the Execution Node Operator Level. The Adhering Entity may assume this Participation Level when it has: ***(i)*** signed **Annex III — Specific Conditions of the Developer Participation Level** and ***(ii)*** successfully passed the internal technical approval and compliance procedure set out for this Level in **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and other applicable ISBE Policies.

- "**Execution Node Operator**": A Participation Level that enables the Adhering Entity to deploy, configure and operate one or more of its own Execution Nodes within the ISBE network (as distinct from Consensus Nodes), thereby assuming an infrastructure role within the ecosystem. At this Participation Level, the Adhering Entity may, subject to the terms set out in the ISBE Policies***: (i)*** use its Execution Nodes as a transactional access point to the ISBE network for its own systems and applications (for example, via RPC endpoints, APIs or specific connectors); ***(ii)*** provide, where permitted, connectivity and *Blockchain-as-a-Service* to authorised third parties, relying on said Execution Nodes; ***(iii)*** integrate the Execution Nodes into its own systems for monitoring, event logging, observability and incident management; and ***(iv)*** participate in the high-availability, redundancy and resilience mechanisms defined for the execution layer of the ISBE network, without intervening in the Consensus Protocol. An Adhering Entity holding this Participation Level must comply with the technical, security, provisioning, availability, capacity and support requirements defined for Execution Nodes in **Policy INF1040 – Node Management Policy** and in the other ISBE Policies, including, where applicable, the obligation to maintain certain service levels (SLAs), keep technical records and cooperate in audits or verifications carried out on the infrastructure. The Adhering Entity may assume this Participation Level once it has: ***(i)*** signed **Annex IV — Specific Conditions for the Execution Node Operator Level** and ***(ii)*** successfully passed the internal technical and node management certification procedure applicable to this Level, in accordance with **Policy INF1040 – Node Management Policy** and the other ISBE Policies.

- "**Consensus Node Operator**": A Participation Level that enables the Adhering Entity to operate one or more Consensus Nodes and actively participate in the ISBE network's Consensus Protocol, contributing to the validation of transactions and to the security and integrity of the infrastructure. At this Participation Level, the Adhering Entity assumes enhanced obligations regarding independence, location, security, availability and compliance with the Consensus Protocol parameters defined in the ISBE Policies. The Consensus Node must be deployed at an identified, stable physical location previously notified to the Managing Entity, situated within the territory of a Member State of the European Union or the European Economic Area or in any of the territories authorised in **Policy INF1040 – Node Management Policy**, and must at all times comply with the technical, security, availability and independence conditions set out in the ISBE Policies. The Adhering Entity may assume this Participation Level when it has: ***(I)*** signed **Annex V — Specific Conditions for the Consensus Node Operator Level**; and ***(II)*** successfully passed the internal technical, security and governance approval procedure provided for this Level, in accordance with **Policy INF1040 – Node Management Policy** and the other ISBE Policies, including any restrictions on the accumulation of roles and segregation of duties that may be provided for this Level of Participation.

- "**Consensus Protocol**": A set of rules, algorithms and technical parameters that determine how transaction blocks are proposed, validated and finalised on the ISBE network, through the exclusive intervention of Consensus Nodes operated by entities holding the Consensus Node Operator Level and which have been previously authorised in accordance with this Framework Agreement and the ISBE Policies. It includes, amongst other elements, the criteria for the selection and rotation of Consensus Nodes, the quorum and voting rules, the thresholds required for block validation, the conditions for transaction finality, and the procedures for managing incidents and failures in the consensus. The definition, review, updating and, where applicable, replacement of the Consensus Protocol is a power reserved for the Management Entity, in accordance with the decisions of the ISBE governance bodies and the ISBE Policies, and shall be carried out exclusively through the corresponding software modifications, network configurations and/or governance smart contracts. No Participant may unilaterally alter or attempt to alter the Consensus Protocol, nor promote forks or unauthorised modifications thereof.

- "**Execution Node**": A node on the ISBE network responsible for processing transactions, maintaining the state of the blockchain and providing services for reading and, where applicable, issuing transactions, without directly intervening in the Consensus Protocol. It may be operated by the Management Entity or by entities holding the Execution Node Operator Level, in accordance with **Policy INF1040 – Node Management Policy** and the other ISBE Policies.

- "**Consensus Node**": A node that forms part of the ISBE network's Consensus Protocol, responsible for proposing and validating transaction blocks. Its operation is subject to strict technical, security (hardening) and availability requirements defined in **Policy INF1040 – Node Management Policy**.

- "**Use Case**": A technological solution (application, service or business process) that utilises the ISBE infrastructure to execute business logic, record transactions and/or anchor evidence, typically through one or more Smart Contracts deployed on ISBE networks other than the base network. Each Use Case must be previously authorised and approved in accordance with **Policy ECO1020 – Policy on the Management of**

Use Cases and SCs, and may, at the request of the Adhering Entity holding the Developer or Execution Node Operator Level, be included in the ISBE service catalogue once deployed.

- "**Smart Contract**": A program or set of codes deployed on the ISBE network that automatically executes predefined conditions. Its deployment on the ISBE network requires passing a technical and cybersecurity compliance test carried out by the Managing Entity, and must be carried out using authorised factory contracts to ensure traceability and compliance with the approved architecture (the "**Factory Contracts**").

- "**DORA Use Case**": A Use Case deployed or to be deployed on the ISBE network which: *(I)* forms part of the ICT services used by one or more financial institutions falling within the scope of Regulation (EU) 2022/2554 ("**DORA Regulation**") for the provision of their regulated services; or *(II)* is used by the Adhering Entity under a contract with a financial institution subject to the DORA Regulation in which it is contractually required to ensure certain digital operational resilience requirements regarding the infrastructure used, including ISBE.

- "**DORA Addendum**": A contractual document supplementing the Framework Agreement that incorporates the specific clauses required by the DORA Regulation and/or by the financial institutions subject to it, in relation to the ICT Services described in the Addendum itself (and its annex of services), which may correspond to one or more Use Cases deployed on the ISBE network. The DORA Addendum shall identify the DORA Use Cases covered, the role of the Adhering Entity in said DORA Use Cases, and the scope of the additional commitments undertaken by the Managing Entity for the sole purpose of facilitating compliance with the DORA Regulation by the financial institutions concerned and/or by the Adhering Entity itself.

- "**DORA Entity**": Any entity falling within the subjective scope of application of the DORA Regulation, whether the Adhering Entity itself or a client of the Adhering Entity in respect of whom a DORA Use Case is deployed on the ISBE network.

THIRD.— GENERAL TERMS AND CONDITIONS OF MEMBERSHIP AND PARTICIPATION

The following general conditions shall apply to the Adhering Entity for as long as this Framework Agreement remains in force and it has signed at least one Role Annex relating to a Participation Level, irrespective of the specific Participation Level or Levels it has assumed at any given time, and without prejudice to any additional provisions set out in the relevant Role Annexes.

1. Admission and general requirements:

1. By signing this Framework Agreement and, simultaneously, at least one Role Annex relating to a Participation Level, the Adhering Entity becomes part of the ISBE network under the terms set out in this Framework Agreement and in said annex(es).

2. The Adhering Entity represents and warrants that, at the time of its accession and throughout the term of this Framework Agreement, it complies with the eligibility requirements established, either generally or specifically for each Participation Level, by this Framework Agreement and the ISBE Policies, including, at a minimum: *(i)* its valid

incorporation and legal capacity; *(ii)* the carrying out of lawful activities; and *(iii)* the successful completion of the *Know Your Business* (KYB)[1] verification processes and any other checks that, in a reasonable and proportionate manner, may be required in accordance with applicable regulations and the ISBE Policies in force at any given time.

3. The Management Entity may verify at any time that these requirements are being met and may, for this purpose, request the provision of up-to-date documentation, in accordance with the provisions of the ISBE Policies.

2. Compliance with Regulations and ISBE Policies

The Adhering Entity undertakes to comply at all times with the regulations applicable to it, the bylaws of the ISBE network (if any) and all ISBE Policies which, according to the information published by the Managing Entity on the ISBE portal and the provisions of the Role Annexes to which it is a party, are applicable to its situation at any given time.

In particular, the Adhering Entity shall be obliged to comply with: *(i)* the ISBE Policies identified by the Managing Entity as generally applicable to all Adhering Entities with a valid Framework Agreement; and *(ii)* with regard to each Level of Participation it has assumed, the ISBE Policies applying that Level of Participation.

The procedure for the approval, amendment and updating of the ISBE Policies shall be as set out in Clause Seven of this Framework Agreement, which the Adhering Entity declares to be aware of and to accept. Material or repeated non-compliance with the ISBE Policies, or with the general obligations arising from this Framework Agreement, may give rise to the measures provided for in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**, including, where applicable, the suspension of services, the revocation of one or more Participation Levels, or the compulsory withdrawal of the Adhering Entity.

3. Access, credentials and communications

1. The Managing Entity shall provide the Adhering Entity with the access credentials[2] necessary to access the ISBE portal and the interfaces enabled for the management of its participation in the network.

2. For the purposes of contractual and operational communications, the channels enabled by the Managing Entity shall be, at a minimum, the following: *(I)* the ISBE Private Area, as the main and contractually binding channel for internal communication, through which official notifications and critical operational communications (including changes and alerts) shall be distributed, and access shall be provided to the private document centre and support tools such as the Help Desk; *(II)* the official email address designated by the Adhering Entity, which shall be used as a secondary or supplementary channel for informative communications, calls for action or notices that complement the information

---

[1] These are understood to be processes for the identification and verification of the Adhering Entity, which include, amongst other matters, the verification of its legal existence, basic registration details, powers of representation and, where applicable, beneficial ownership and declared activity, all in accordance with applicable regulations and the ISBE Policies.

[2] For example, username and password, digital certificates or equivalent mechanisms.

available in the Private Area; and *(III)* a periodic newsletter, of a purely informative nature, which may be sent by email to registered members of the ecosystem.

Through these channels, the Adhering Entity may manage its relationship with the Managing Entity and with the ISBE network, including, in particular, the processing of applications for membership, modification or withdrawal from Participation Levels through the signing, amendment or termination of the relevant Role Annexes, as well as the receipt of notifications and communications relating to the operation of the network and to ISBE Policies.

3. The Adhering Entity shall be responsible for the diligent safekeeping of its credentials and the proper management of authorised users under its control, and shall be liable to the Managing Entity and to third parties for the use made of such credentials by those users, unless there is evidence of theft, loss or misuse duly notified to the Managing Entity in accordance with the terms set out in the ISBE Policies.

4. General financial contributions

1. As a contribution to the sustainability of the network, the Adhering Entity shall pay the membership fees, charges or levies provided for in the ISBE economic model, both generally and, where applicable, specifically associated with the Participation Levels it has undertaken or the services it consumes.

2. The amounts, items, frequency and payment terms of such financial contributions shall be determined in accordance with the provisions of this Framework Agreement, the Role Annexes and the ISBE Policies, and shall be communicated to the Member Organisation with reasonable notice, applying objective and non-discriminatory criteria in all cases.

3. The Adhering Entity undertakes to meet all its financial obligations punctually in accordance with the amounts and deadlines notified to it. Failure to pay in accordance with the terms set out in this Framework Agreement and in the ISBE Policies may constitute a material breach of contract and entitle the Managing Entity to take remedial measures consisting of suspension of services, revocation of Participation Levels or compulsory termination, without prejudice to the recovery of amounts due.

5. General liability and proper use of the network

1. The Adhering Entity is responsible for using the ISBE infrastructure in good faith, in full compliance with applicable law, the rights of other entities participating in the network, and the principles of integrity, security and stability of the infrastructure.

2. In particular, the Adhering Entity shall refrain from: *(I)* using the ISBE network for activities that are unlawful or contrary to public policy; *(II)* introducing malicious code, intentional vulnerabilities or configurations that compromise the security, availability or proper functioning of the network; and *(III)* taking any action that could significantly damage the reputation of ISBE or its Participants.

3. The Adhering Entity shall hold the Managing Entity and the other entities participating in the ISBE network harmless against any claim, penalty, damage or cost arising from its own acts or omissions on the ISBE network or those of persons for whom it is responsible, without

prejudice to any limitations of liability that may be set out in this Framework Agreement or in the ISBE Policies.

FOURTH.—INTELLECTUAL AND INDUSTRIAL PROPERTY

1. The signing of this Framework Agreement does not imply any transfer of intellectual or industrial property rights between the Parties. Each Party shall at all times retain ownership of its pre-existing intangible assets or those developed outside the ISBE network.

2. The intellectual and industrial property rights over the applications, *Smart Contracts*, codes, technical documentation and any other developments that the Adhering Entity creates, deploys or operates on the ISBE network shall belong to the Adhering Entity itself or to the relevant third parties, without prejudice to the regime of licences, authorisations, assignments, limitations on use and other conditions set out in **Policy NOR1070 – Intellectual Property Policy**, which the Adhering Entity declares to be aware of and to accept.

3. The Adhering Entity's use of the technological infrastructure, software components and other intangible assets owned by the Managing Entity within the scope of ISBE shall be subject to the licensing regime set out in **Policy NOR1070 – Intellectual Property Policy** and in any other applicable ISBE Policies, with such licence automatically terminating in the circumstances and under the terms provided therein.

FIFTH.— CONFIDENTIALITY

1. The confidentiality regime applicable to the information to which the Parties have access upon the signing and during the term of this Framework Agreement and/or any of the Participation Levels that the Adhering Entity assumes through the corresponding Role Annexes shall be governed by the provisions of **Policy NOR1050 – Confidentiality Policy**, which the Adhering Entity declares to be aware of and to accept, and which is deemed to be incorporated into this Framework Agreement by reference.

SIXTH.— PROTECTION OF PERSONAL DATA

1. The Parties guarantee full compliance with current regulations on the protection of personal data, in particular Regulation (EU) 2016/679 and the implementing Spanish legislation (Spanish Organic Law 3/2018 on the Protection of Personal Data and the Guarantee of Digital Rights, and other applicable provisions).

   Notwithstanding the foregoing, the detailed regime applicable to the processing of personal data within the context of the ISBE network —including, amongst other matters, the assignment of roles as data controller and data processor, information obligations, technical and organisational security measures, the management of security incidents and breaches, the use of personal data in *on-chain* records, and the conditions for the eventual formalisation of data processing agreements— shall be governed by the provisions of Policy **NOR1060 – Personal Data Protection Policy**, which the Adhering Entity declares to be aware of and to accept, and which is deemed to be incorporated into this Framework Agreement by reference, the Parties undertaking to comply with it at all times to the extent that it applies to them.

SEVENTH.— TERM, AMENDMENT AND TERMINATION OF THE FRAMEWORK AGREEMENT

1. Duration and extensions

This Framework Agreement shall be effective from the date of its signature by both Parties and shall have an initial term of **one (1) year** from that date, remaining in force for as long as the Adhering Entity has signed at least one Role Annex relating to a Participation Level in the ISBE network.

Upon expiry of this initial period, the Framework Agreement shall be tacitly extended for successive periods of one (1) year, unless either Party notifies the other in writing of its intention not to extend it, giving at least three (3) months' notice prior to the expiry date of the initial period or any of its extensions.

Each Role Annex signed shall form an integral part of the Framework Agreement and its validity shall be subject to that of the Framework Agreement, unless the relevant Role Annex is terminated individually in accordance with its own clauses[3]. The termination of the last Role Annex maintained in force by the Adhering Entity shall, in any event, result in the automatic termination of this Framework Agreement on the same date on which such termination takes effect.

2. Amendment of ISBE Policies and Precedence over the Framework Agreement

The Adhering Entity acknowledges and accepts that the ISBE Policies implementing this Framework Agreement, as well as any others that may be in force and applicable at any given time according to the information published by the Managing Entity, shall be approved and may be amended, replaced or repealed unilaterally by the Managing Entity, in the exercise of its governance functions over the ISBE network and in accordance with the rules governing the adoption of resolutions by its administrative and governing bodies in force at any given time.

The Managing Entity shall notify the Adhering Entity of any amendments to the ISBE Policies (via the ISBE portal or another designated channel), indicating the date of entry into force and, where appropriate, granting a reasonable period for their implementation where necessary.

Amendments to the ISBE Policies shall be fully applicable and binding on the Adhering Entity from the date indicated in the relevant notification and shall be considered a technical, organisational and/or regulatory development of this Framework Agreement, which shall be deemed adapted to the extent strictly necessary to align with the current version of said ISBE Policies, without this implying that the validity or performance of the Framework Agreement is left to the discretion of the Managing Entity under the terms of Article 1256 of the Spanish Civil Code. In the event of any discrepancy or conflict between the provisions of this Framework Agreement and the content of the current ISBE Policies applicable to the Adhering Entity, the provisions of said ISBE Policies shall prevail to the extent that they regulate technical, organisational or operational aspects of participation in ISBE, with the

[3] For example, the waiver or revocation of a specific Participation Level without this necessarily implying the complete withdrawal of the Participating Entity from the ISBE network.

Framework Agreement being automatically adapted to the extent strictly necessary to reflect such precedence.

If any update to the ISBE Policies entails a substantial and objectively onerous alteration of the Adhering Entity's contractual obligations, the Adhering Entity may express its disagreement in writing and, should the disagreement persist, request voluntary withdrawal prior to the effective date of the relevant amendment; in such a case, the Framework Agreement shall be deemed terminated without any penalty for the Adhering Entity and without any obligation to pay any amount other than those accrued up to the effective date of termination.

Apart from the provisions of the preceding paragraphs, any other amendment to the clauses of this Framework Agreement or the Role Annexes must be made in writing and by mutual agreement between the Parties.

3. Termination of the Framework Agreement

1. *Voluntary withdrawal by the Adhering Entity*

The Adhering Entity may, at any time, terminate its participation in the ISBE network and, consequently, terminate this Framework Agreement, by giving written notice to the Managing Entity at least fifteen (15) calendar days in advance, in accordance with the voluntary withdrawal procedure set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

The technical and operational aspects of the disconnection and *offboarding* process (including, where applicable, the revocation of access rights, the deactivation of nodes and the delisting of services or Use Cases) shall be governed in full by the provisions of **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

2. *Termination for breach and compulsory withdrawal*

The Managing Entity may agree to terminate this Framework Agreement and forcibly remove the Adhering Entity from the ISBE network in the circumstances and under the conditions set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**, in the event of a serious or repeated breach of the obligations arising from the Framework Agreement itself, the Role Annexes or the applicable ISBE Policies.

The procedure, stages, time limits, guarantees of a hearing and decision-making process applicable to compulsory withdrawal shall be those set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**. Compulsory withdrawal due to breach does not preclude a possible claim for damages if the actions of the Adhering Entity have caused actual damage to the Managing Entity, the ISBE network or third parties.

3. *Effects of the termination of the Framework Agreement*

The termination of this Framework Agreement, for any reason, shall not affect those provisions which, by their nature, must remain in force, including, but not limited to, those relating to confidentiality, personal data protection, intellectual property, limitations of

liability and dispute resolution procedures, as well as any others provided for in this Framework Agreement or in the ISBE Policies.

The Adhering Entity acknowledges that, following its withdrawal from the ISBE network, it shall have no right to claim any compensation or indemnity for the loss of its status as a Participant or for the discontinuation of its Use Cases on the network, without prejudice to the possible refund of financial guarantees which, where applicable, may have been provided and not applied to cover breaches or outstanding debts in accordance with the terms set out in the ISBE Policies.

EIGHTH.— SPECIFIC REGIME FOR DORA USE CASES

1. Where the Adhering Entity intends to deploy or operate one or more DORA Use Cases on the ISBE network, it must, prior to the production deployment of such DORA Use Cases, sign the corresponding DORA Addendum with the Managing Entity.

2. The DORA Addendum shall be supplementary to this Framework Agreement and the ISBE Policies. In the event of any conflict between the provisions of this Framework Agreement or the ISBE Policies and the provisions of a DORA Addendum, the latter shall prevail exclusively in relation to the DORA Use Cases expressly identified therein, with the Framework Agreement and the ISBE Policies applying generally in all other respects.

3. The Adhering Entity undertakes not to deploy or operate any DORA Use Case on the ISBE network in production until a DORA Addendum expressly covering that DORA Use Case is in force between the Managing Entity and the Adhering Entity.

4. The Adhering Entity shall notify the Managing Entity without delay of the occurrence or possible occurrence of the circumstances that determine the classification of a Use Case as a DORA Use Case, in accordance with the definitions set out in this Framework Agreement and the DORA Addendum, undertaking to suspend or refrain from commencing the operational deployment of said DORA Use Case until the relevant DORA Addendum has been signed.

NINTH.— APPLICABLE LAW AND DISPUTE RESOLUTION

1. This Framework Agreement, the Role Annexes forming part thereof and the ISBE Policies implementing shall be governed by and construed in accordance with Spanish civil law.

2. For the resolution of any dispute, discrepancy or claim arising from the interpretation or performance of this Framework Agreement, its Role Annexes or, where applicable, the ISBE Policies, the Parties shall endeavour, as a preliminary step, to reach an amicable solution through the ISBE governance channels.

   To this end, either Party may notify the other of its position in writing, thereby initiating a period of **direct negotiation** of thirty (30) calendar days from receipt of such notification. During this period, at least one meeting —in person or online— shall be held, convened by the Managing Entity, and the Parties shall make reasonable efforts to reach an agreement.

The amicable settlement may optionally be based on voluntary mediation mechanisms managed by the Managing Entity or by an independent third party.

If, upon expiry of this period, no agreement has been reached to resolve the dispute, each party, expressly waiving any jurisdiction to which it might otherwise be entitled, submits to the jurisdiction of the Courts and Tribunals of [*Madrid*] (or of the locality where the Managing Entity has its registered office, if different), which shall have jurisdiction to hear the matter.

If, by virtue of a legal requirement, the Adhering Entity holds the status of a Public Administration and cannot submit to ordinary civil jurisdiction, the Parties agree that any dispute shall be resolved in accordance with the provisions of public sector contract law or contentious-administrative law, as applicable.

[SIGNATURE PAGE AND ANNEXES FOLLOW]

In witness whereof, the parties sign this Framework Agreement together with its annexes —where applicable— in duplicate and for a single purpose, at the place and on the date indicated in the heading.

Annex I — Specific Conditions for the Basic Level

1. Applicability

This Annex I shall apply when the Adhering Entity, having signed the Framework Agreement, signs this Annex I and obtains authorisation to hold the **Basic Level** in the ISBE network, in accordance with **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

2. Purpose of the Annex

The purpose of this Annex I is to establish the specific conditions under which the Basic Level accesses and uses ISBE's infrastructure and services at a limited and non-intrusive operational level, without operating its own nodes and without direct interaction with the ***blockchain*** beyond the flows enabled and supervised by ISBE.

3. Enrolment as a Basic Level

The Adhering Entity shall hold Basic Level status for as long as the Framework Agreement and this Annex I remain in force and it complies, at all times, with the specific admission and retention requirements associated with this Participation Level as set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and in the other applicable ISBE Policies, including, in particular, the obligations regarding information updates and identity management set out in **Policy INF1050 – Policy on the management of digital identities, credentials and access**.

The Managing Entity may periodically review compliance with these requirements and, where appropriate, reconsider the authorisation as a Basic Participant in accordance with the Framework Agreement and **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

4. Basic Level functional capabilities

As a Basic Level member, the Adhering Entity may, subject to the terms and limits set out in the applicable ISBE Policies, in particular **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and **Policy ECO1030 – SC Pause/Block and Data Deletion Policy**:

a. Access the private area and the ISBE portal, including documentation, manuals, communications, operational notices and other content that the Managing Entity makes available to ecosystem Participants.

b. To use pre-configured ***Smart Contract*** libraries, assistants and ***wizards*** offered by ISBE in a non-programmatic and supervised deployment mode, always via authorised workflows and tools and without direct access to network nodes, in accordance with **Policy ECO1020 – Policy on the Management of Use Cases and SCs**.

c. Access, where enabled, basic notarisation, evidence registration and time-stamping services on the ISBE infrastructure, under the terms set out in **Policy ECO1020 –**

Policy on the Management of Use Cases and SCs and subject to the data protection safeguards of **Policy NOR1060 – Personal Data Protection Policy**.

d. Access and use the common support and communication elements of the ISBE ecosystem, including, at a minimum: *(I)* access to helpdesk channels and other enabled support services; and *(II)* the receipt of official notifications and operational communications via the ISBE Private Area, so that even Adhering Entities without advanced technological capabilities have adequate mechanisms for assistance, transparency and compliance. Furthermore, the Basic Level may include access to an internal and controlled mechanism for the distribution of operational tokens (*faucet* or equivalent system), intended exclusively to provide the gas strictly necessary for the execution of authorised operations, in accordance with ISBE Policies and, where applicable, with **Policy ADM1010 – Policy on Fees and Remuneration**, without this implying access to external markets or the creation of an investment or speculative instrument.

e. Submit queries, requests and, where applicable, proposals for progression to other Participation Levels through the channels defined in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

Under no circumstances does the Basic Level, on its own, authorise the operation of ISBE network nodes or the deployment of proprietary node infrastructure; this will require, where applicable, the assumption of the Execution Node Operator and/or Consensus Node Operator Levels via the relevant annexes.

5. Specific obligations of the Basic Level

Without prejudice to the general obligations assumed in the Framework Agreement and the applicable ISBE Policies, the Basic Level undertakes, in particular, to:

a. Use ISBE's infrastructure, private area and services exclusively for lawful purposes and those specific to its activity, at all times complying with **Policy NOR1020 – Organisational Liability Policy**, **Policy NOR1030 – Code of Ethics**, **Policy NOR1040 – Conflict of Interest Policy**, **Policy NOR1080 – Competition and Neutrality Policy** and **Policy NOR1090 – Environmental Sustainability Policy**.

b. Comply with the confidentiality obligations set out in the Framework Agreement and in **Policy NOR1050 – Confidentiality Policy**, in relation to any non-public information accessed via the portal or ISBE's services.

c. Process personal data in accordance with **Policy NOR1060 – Personal Data Protection Policy**, minimising the inclusion of personal data in any functionality that may generate logs on the ISBE infrastructure and prioritising the use of hashing, referencing or pseudonymisation mechanisms where provided for by ISBE Policies and, in particular, **Policy ECO1030 – Policy on Suspension/Blocking of SCs / Data Deletion**.

d. Respect intellectual property rights and the licensing regime defined in **Policy NOR1070 – Intellectual Property Policy**, particularly with regard to the use of

documentation, libraries, templates, wizards and other assets made available to you by ISBE.

e. Manage access credentials, certificates, API *keys* or other authentication and authorisation mechanisms in accordance with **Policy INF1050 – Policy on the management of digital identities, credentials and access**, ensuring their safekeeping, diligent use and non-disclosure to unauthorised third parties.

f. Use *wizards*, libraries and notarisation or registration services solely through the channels and workflows approved by the Managing Entity, refraining from attempting to circumvent such workflows or from interacting directly with nodes or infrastructure layers to which you are not authorised to access.

   Where the Adhering Entity uses the *wizards* or *Smart Contract* deployment assistants associated with the Basic Level to generate transferable *on-chain* assets or instruments (including, by way of example only, tokens issued on a Use Case network), it must keep and maintain an *off-chain*, minimal, accurate and up-to-date, of the entities or persons to whom it delivers such assets within the framework of the primary issuance, in accordance with the terms and scope set out in the ISBE Policies, in particular in **Policy ECO1020 – Policy on the Management of Use Cases and SCs**, without prejudice to the provisions of **Policy NOR1060 – Personal Data Protection Policy** regarding any data that may be included in said register. Said register shall serve exclusively for the purposes of basic traceability and to reinforce the issuer's accountability and the coherence of the ecosystem, and shall not in itself constitute a procedure for identification, due diligence or comprehensive compliance in relation to the prevention of money laundering or terrorist financing. The Adhering Entity shall not be obliged, under this Framework Agreement, to identify beneficial owners or to monitor subsequent transfers of the issued assets between third parties.

g. To respond to operational communications and notices issued by the Management Entity via the portal or other authorised channels, implementing within a reasonable timeframe any measures required of it to ensure appropriate use in accordance with the ISBE Policies.

6. Financial terms

Any fees, charges, tariffs or other financial conditions associated with the Basic Level shall be governed entirely by the provisions of **Policy ADM1010 – Policy on Fees and Remuneration**, in its current version.

Failure to pay the applicable amounts may constitute a material breach and entitle the Managing Entity to take the measures provided for in the Framework Agreement and in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**, including, where applicable, the suspension of services and compulsory removal from the ISBE ecosystem.

7. Termination or modification of the Basic Level

Voluntary withdrawal, revocation or any other form of termination of the Basic Level shall be governed by the provisions of the Framework Agreement and the **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**. The termination of this Annex I shall

not in itself entail the termination of the Framework Agreement whilst the Adhering Entity maintains at least one other Participation Level in force.

8. ISBE policies applicable to the Basic Level

Code	Policy Name
NOR1020	Organisational Liability Policy
NOR1030	Code of Ethics
NOR1040	Conflict of Interest Policy

Annex II – Specific Conditions for the Observer Level

1. **Applicability**:

   This Annex II shall apply when the Adhering Entity, having signed the Framework Agreement, signs this Annex II and obtains authorisation to hold **Observer Level** status within the ISBE network, in accordance with **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**. Access to this Participation Level is reserved exclusively for Adhering Entities that are legal persons incorporated under the law of a Member State of the European Union or the European Economic Area, which have the status of a supervisory, regulatory or public body with functions of control, audit, supervision or institutional evaluation, and which demonstrate to the Managing Entity a legitimate public interest in having read-only access to the ISBE network.

   Assumption of the Observer Level shall, as a general rule, be incompatible with the simultaneous assumption of other Participation Levels, unless the ISBE Policies expressly provide otherwise for specific cases.

2. **Purpose of the annex**:

   To regulate the specific rights, powers and obligations of the Adhering Entity in its capacity as an Observer, understood as a passive and non-transactional Participation Level, intended for qualified organisations (including, amongst others, regulatory bodies, supervisory authorities, auditing bodies or relevant academic institutions) that require broad and continuous visibility of the ISBE network's activity for the purposes of supervision, control, analysis or study, without the capacity to issue transactions or modify the infrastructure's operations, and with limited access to the technical consultation tools made available by the Managing Entity.

3. **Authorisation and technical environment**:

   In addition to the general access rights derived from the Framework Agreement, the Observer may have access to specific tools for monitoring, exploration and advanced querying of the network made available by the Managing Entity, under the terms and within the limits established in the ISBE Policies.

   This access shall include read-only exploration of the status of the ISBE network (including, by way of example only, blocks, transactions, metrics and aggregated statuses), as well as the use of advanced observability tools integrated by the Managing Entity (monitoring dashboards, scorecards and operational logs) that enable the Observer to analyse the system's behaviour, its stability and the temporal evolution of its key indicators, with a level of visibility comparable to that of ISBE's administrative staff, although in no case with the authority to issue transactions or modify the network status.

4. **Observer Level Rights**:

   a. The Observer may access, in real time, the public information recorded on the ISBE blockchain (including, but not limited to, blocks, transactions, events and visible statuses), via the block explorer and the exploration and query tools made available by the Management Entity.

b. The Observer may receive, to the extent that the Managing Entity produces and distributes them, technical reports, aggregated network performance metrics, documentation regarding the infrastructure's regulatory compliance, and other materials specifically intended for the purposes of supervision, monitoring, analysis or study.

c. Observer status does not in itself confer powers to intervene in the operation of the ISBE network or voting rights in the governing bodies. Without prejudice to other Levels of Participation or specific agreements that the Adhering Entity may hold, the Observer may be invited to participate in consultations, working groups or other interaction mechanisms provided for in the ISBE Policies, without this being binding on the Management Entity unless expressly stated otherwise in a specific agreement or instrument.

d. The Observer may communicate to the Managing Entity any findings, recommendations or warnings it deems relevant as a result of its monitoring or analysis activities, with the aim of contributing to the improvement and robustness of the ecosystem, whilst at all times maintaining the applicable duties of confidentiality and discretion.

5. Obligations of the Observer Level:

a. *Enhanced confidentiality*: The Observer shall treat as confidential all non-public information to which it gains access by virtue of this Participation Level, using it exclusively for the purposes of supervision, control, analysis or study specific to its role and in accordance with **Policy NOR1050 – Confidentiality Policy** and **Policy NOR1060 – Personal Data Protection Policy**, where applicable. This obligation is understood to reinforce the general confidentiality clause of the Framework Agreement.

b. *No technical interference*: The Observer undertakes to use the available information and associated tools in read-only mode, refraining from any attempt to circumvent technical restrictions, issue transactions or interfere with the normal operation of the ISBE network, in accordance with **Policy INF1050 – Policy on the management of digital identities, credentials and access**.

c. *Compliance reports*: as the Observer is a regulatory authority, official supervisor or other entity with public supervisory functions, it shall cooperate with the Managing Entity in accordance with the terms set out in the applicable ISBE Policies, sharing the relevant conclusions of its reviews on a confidential basis where appropriate and within the scope of its legal powers.

6. Financial conditions:

The financial conditions associated with the Observer Level, including, where applicable, specific fees, charges or rates, shall be governed by the provisions of **Policy ADM1010 – Policy on Fees and Remuneration**, in its version in force at any given time.

As of the date of signing of this Annex II, the role of Observer does not entitle the Adhering Entity to any remuneration and does not entail any additional financial consideration other than that which, where applicable, is generally established in **Policy ADM1010 –Policy on Fees and Remuneration**.

7. **Termination of the Observer Level**:

Voluntary withdrawal, revocation or any other form of termination of the Observer Level shall be governed by the provisions of the Framework Agreement and **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**. The termination of this Annex II shall not in itself result in the termination of the Framework Agreement whilst the Adhering Entity maintains at least one other Participation Level in force.

8. **ISBE policies applicable to the Observer Level**

Annex III – Specific Conditions for the Developer Level

1. Applicability

This Annex shall apply when the Adhering Entity has signed the Framework Agreement and is authorised to hold the Developer Level within the ISBE network, in accordance with **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and **Policy ECO1020 – Policy on the Management of Use Cases and SCs**.

Any combination of this Participation Level with other Participation Levels shall be governed by the provisions of **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and the other ISBE policies, in particular those relating to functional segregation, conflicts of interest and node operation.

2. Purpose of the annex

The purpose of this annex is to set out the specific conditions under which the Adhering Entity shall fulfil the Developer Level, understood as the role that enables the design, development, deployment and maintenance of Use Cases and *Smart Contracts* on the ISBE networks, as well as the provision of services based on that infrastructure, all in accordance with the terms set out in **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and in the other applicable ISBE Policies.

This Participation Level shall not entitle the Adhering Entity to operate ISBE network nodes; the operation of nodes shall, where applicable, require the assumption of the specific levels of Execution Node Operator and/or Consensus Node Operator through the relevant annexes.

3. Requirements for access and authorisation as a Developer

In order for the Adhering Entity to hold the Developer Level, it must, at all times:

a. Comply with the general requirements for admission, continued membership and updating of information set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

b. Demonstrate sufficient technical and organisational capacity to design, develop, deploy and maintain Use Cases and *Smart Contracts* in accordance with the criteria of **Policy ECO1020 – Policy on the Management of Use Cases and SCs**, taking into account, where applicable, the risk assessment criteria applied by the Managing Entity in accordance with its internal risk management policies.

c. Pass the evaluation, approval and, where applicable, technical and cybersecurity audit processes set out in **Policy ECO1020 – Policy on the Management of Use Cases and SCs**.

d. Sign this annex, accepting the specific obligations associated with the Developer Level and undertaking to comply with the operational guidelines issued by the Managing Entity in accordance with the ISBE Policies.

The Managing Entity may refuse or revoke authorisation as a Developer where these requirements are not met or cease to be met, in accordance with the Framework Agreement,

Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem, and **Policy ECO1020 – Policy on the Management of Use Cases and SCs**.

4. Functional Capabilities of the Developer Level

In its capacity as a Developer, the Adhering Entity may, under the terms and within the limits set out in **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and **Policy ECO1030 – Policy on Suspension/Blocking of SCs / Data Deletion**:

a. Design and propose Use Cases for deployment on ISBE networks, subjecting them to the evaluation, prioritisation and approval procedures set out in **Policy on the Management of Use Cases and SCs**.

b. Deploy *Smart Contracts* using exclusively the channels and tools authorised by ISBE, including, in particular: ***(I)*** the use of the no-code wizard and standard libraries of *Smart Contracts* preconfigured and pre-approved by ISBE, which allow the deployment of contracts based on standard templates without the need for programming, in accordance with the control flows defined in **Policy ECO1020 – Policy on the Management of Use Cases and SCs**; and ***(II)*** the deployment of the Developer's own developments that have previously passed the compliance or approval test defined in **Policy ECO1020 – Policy on the Management of Use Cases and SCs**, in which, amongst other aspects, security, interoperability, traceability and regulatory compliance are assessed. Only *Smart Contracts* that have successfully passed this compliance test may be authorised to operate on the ISBE network and managed through the corresponding Factory Contracts.

c. To use the infrastructure and Blockchain-as-a-Service (BaaS) services that ISBE makes available to Developers or, where applicable, that are provided through Execution Node Operators, under the terms set out in **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and **Policy INF1050 – Policy on the management of digital identities, credentials and access**, without this implying the operation of their own nodes.

d. Request, where applicable, the inclusion of their Use Cases and associated services in the ISBE solutions catalogue or directory, in accordance with **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and **Policy ADM1010 – Policy on Fees and Remuneration** regarding financial conditions.

5. Specific Obligations of the Developer Level

In addition to the obligations arising from the Framework Agreement and the ISBE Policies, the Adhering Entity, as a Developer, must:

a. Strictly comply with the provisions of **Policy ECO1020 – Policy on the Management of Use Cases and SCs**, and **Policy ECO1030 – Policy on Suspension/Blocking of SCs / Data Deletion**, in relation to the lifecycle of Use Cases and *Smart Contracts*.

b. Use exclusively the mechanisms for deploying, updating, pausing and withdrawing *Smart Contracts* provided for in **Policy ECO1020 – Policy on the Management of Use Cases and SCs**, including Factory Contracts and other authorised technical governance components, refraining from deploying or modifying code outside these channels.

c. Comply with the intellectual property obligations and licensing regime set out in **Policy NOR1070 – Intellectual Property Policy**, including the rules relating to ownership, licensing, contributions to the ISBE network and the use of common components.

d. Comply with the confidentiality and privacy obligations set out in **Policy NOR1050 – Confidentiality Policy** and in **Policy NOR1060 – Personal Data Protection Policy**, minimising the inclusion of personal data in on-chain records and using, as far as possible, hashing techniques, pseudonymisation or other equivalent mechanisms, in accordance with **Policy ECO1030 – Policy on Suspension/Blocking of SCs / Data Deletion**.

e. Comply with the rules on neutrality, fair competition and the prevention of conflicts of interest set out in **Policy NOR1040 – Conflict of Interest Policy** and **Policy NOR1080 – Competition and Neutrality Policy**, particularly when providing services to third parties via the ISBE infrastructure.

f. Provide the Managing Entity with the information reasonably necessary to enable it to assess risks, incidents and compliance with ISBE Policies in relation to the Use Cases and *Smart Contracts* deployed, and cooperate in any review or audit procedures that may be carried out in respect of such Use Cases.

g. Assume, in relation to the Use Cases and *Smart Contracts* it develops or deploys, full responsibility for their lifecycle, the security of the associated services and the legal implications arising from their use, ensuring compliance with the applicable obligations regarding data protection, intellectual property, cybersecurity and sector-specific regulations. To this end, you shall implement identification and due diligence procedures (including, where appropriate, KYB/KYC/AML controls) appropriate to the nature of the services provided and the end users, in accordance with applicable regulations and ISBE Policies.

h. Where the nature of the Use Case so requires due to the generation of significant transactional activity, access to critical functionalities or potential exposure to regulatory risks, maintain a verifiable, proportionate and up-to-date *off-chain* register of end users interacting with the deployed services, within the scope set out in **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and without prejudice to the provisions of Policy **NOR1060 – Personal Data Protection Policy** regarding any data that may be included in said register. This register shall serve the purpose of traceability and reinforcing the issuer's accountability and shall not in itself constitute a comprehensive compliance system regarding the prevention of money laundering or terrorist financing. It may be subject to review or audit, upon reasoned request, by the Management Entity or the competent authority, particularly in the event of a security incident or an investigation into possible breaches.

i. Diligently monitor vulnerabilities, incidents and anomalies associated with the Use Cases and *Smart Contracts* under its control, as well as related integrations, APIs and libraries, responding without undue delay to any incidents that occur and applying the updates, corrections and improvements that are necessary or indicated by the Management Entity or by the ISBE Policies, in order to maintain a level of security and quality in line with the standards required on the ISBE network.

6. Financial terms

The tariffs, fees, charges, compensation or any other financial conditions associated with the Developer Level, including the consumption of *Blockchain-as-a-Service* (BaaS) services, the use of advanced tools or the inclusion of services in catalogues, shall be governed entirely by the provisions of **Policy ADM1010 – Policy on Fees and Remuneration**, in its version in force at any given time.

7. Termination of the Developer Level

Voluntary withdrawal, revocation or any other form of termination of the Developer Level shall be governed by the provisions of the Framework Agreement and **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**, without prejudice to the operational consequences for deployed Use Cases and *Smart Contracts* (including their suspension, blocking, migration or removal) being in accordance with the provisions of **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and in **Policy ECO1030 – Policy on Suspension/Blocking of SCs / Data Deletion**.

8. ISBE policies applicable to the Developer Level

Code	Policy Name

Annex IV – Specific Conditions for the Execution Node Operator Level

1. Applicability

This annex shall apply where the Adhering Entity has signed the Framework Agreement and has been authorised to hold the Execution Node Operator Level within the ISBE network, in accordance with **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and **Policy INF1040 – Node Management Policy**.

Any combination of this Participation Level with other Participation Levels shall be governed by the provisions of **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and the other ISBE Policies, in particular those relating to functional separation, conflicts of interest and neutrality.

2. Purpose of the Annex

The purpose of this annex is to establish the specific conditions under which the Adhering Entity shall perform the Execution Node Operator Level, understood as the role that enables the operation of one or more Execution Nodes of the ISBE network (distinct from Consensus Nodes), with the capacity to process and forward transactions, maintain complete copies of *the ledger* and, where applicable, provide connectivity services to authorised third parties, in accordance with the terms set out in **Policy INF1040 – Node Management Policy** and in the other applicable ISBE Policies.

This Participation Level will not enable the Adhering Entity to participate in the ISBE network's Consensus Protocol, which will require, where applicable, the assumption of the Consensus Node Operator Level via the relevant specific annex.

3. Requirements for access and authorisation as an Execution Node Operator

In order for the Adhering Entity to hold the Execution Node Operator Level, it must, at all times:

a. Comply with the general requirements for admission, continued membership and updating of information set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

b. Demonstrate sufficient technical and organisational capacity to operate Execution Nodes in accordance with the criteria of **Policy INF1040 – Node Management Policy**, including, amongst others, the infrastructure, connectivity, security and monitoring requirements defined by that policy.

c. Pass the technical, security and, where applicable, resilience assessment processes provided for in **Policy INF1040 – Node Management Policy**.

d. Sign this annex, accepting the specific obligations associated with the Execution Node Operator Level and undertaking to comply with the operational guidelines issued by the Managing Entity in accordance with the ISBE Policies.

e. The Managing Entity may refuse or revoke authorisation as an Execution Node Operator where these requirements are not met or cease to be met, in accordance with

the Framework Agreement, Policy **ECO1010 – Policy on joining and leaving the ISBE ecosystem,** and **Policy INF1040 – Node Management Policy**.

4. Technical environment and location of the Execution Node

4.1. The Execution Node(s) must operate under the technical, security, availability and monitoring conditions set out in **Policy INF1040 – Node Management Policy**.

4.2. The Execution Nodes must be deployed at identified and stable physical locations, situated in one of the territories listed as authorised in **Policy INF1040 – Node Management Policy**, and previously notified to the Managing Entity in the manner provided for in that policy. Any material change to the location or relevant configuration of the Execution Nodes shall comply with the notification procedures and, where applicable, the validation or approval procedures set out in **Policy INF1040 – Node Management Policy**.

5. Specific obligations of the Execution Node Operator

In addition to the obligations arising from the Framework Agreement and the ISBE Policies, the Adhering Entity, as an Execution Node Operator, shall:

a) Operate its Execution Nodes in such a way as to maintain the levels of availability, performance and security established by **Policy INF1040 – Node Management Policy**, applying the configurations and hardening measures required by that policy.

b) Manage the identities, credentials and access rights associated with its Execution Nodes in accordance with **Policy INF1050 – Policy on the management of digital identities, credentials and access**, ensuring the proper use and safekeeping of the associated technical credentials.

c) Notify the Managing Entity without delay of any relevant incident that may affect the proper functioning of their Execution Nodes or the integrity of the ISBE network, in accordance with the communication channels and procedures defined in **Policy INF1040 – Node Management Policy**.

d) Respect the duties of confidentiality regarding the technical and operational information to which they have access in their capacity as an Execution Node Operator, in accordance with **Policy NOR1050 – Confidentiality Policy** and, where applicable, **Policy NOR1060 – Personal Data Protection Policy**.

e) Comply with the rules on neutrality, fair competition and the prevention of conflicts of interest set out in **Policy NOR1040 – Conflict of Interest Policy** and in **Policy NOR1080 – Competition and Neutrality Policy**, particularly when using its Execution Nodes to provide connectivity or access services to third parties on the ISBE network.

f) Provide the Managing Entity with the information and evidence it reasonably requests to verify compliance with **Policy INF1040 – Node Management Policy** and other ISBE Policies relating to the operation of its Execution Nodes.

g) Ensure, in relation to the services it develops, operates or channels through its Execution Nodes, a level of security and control aligned with the standards defined in

the ISBE Policies, assuming the technical and legal responsibility arising from their use and implementing, where required by the nature of the services or end users, appropriate identification and due diligence procedures (including, where applicable, KYB controls and, where appropriate, KYC/AML) in accordance with applicable regulations and ISBE Policies.

h) Maintain, where required by the ISBE Policies or the nature of the services provided, a verifiable, proportionate and up-to-date *off-chain* record of the identity of end users linked to transactions channelled through its Execution Nodes that generate significant transactional activity, access to critical functionalities or potential exposure to regulatory risks, in full compliance with **Policy NOR1060 – Personal Data Protection Policy**. This record shall be held by the Adhering Entity itself and may only be made available to the Managing Entity or the competent authorities in the circumstances and to the extent provided for in the ISBE Policies, in particular for the purposes of auditing, managing critical incidents or responding to duly substantiated legal requests.

i) Serious or repeated breaches of the technical, regulatory or governance obligations associated with the operation of Execution Nodes may result, in accordance with **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and **Policy INF1040 – Node Management Policy**, to the adoption of corrective measures by the Managing Entity, including, where appropriate, the temporary suspension of the node, the revocation of its authorisation and/or the termination of the Execution Node Operator Level, without prejudice to any other actions deemed appropriate to preserve the integrity and stability of the ISBE network.

6. Limitations and Proper Use of Execution Nodes

The Adhering Entity shall use its Execution Nodes solely for the purposes and services set out in **Policy INF1040 – Node Management Policy**, **Policy ECO1020 – Policy on the Management of Use Cases and SCs** and other applicable ISBE Policies and, in particular:

a) It shall refrain from using its Execution Nodes to participate in the ISBE network Consensus Protocol, unless it additionally assumes the Consensus Node Operator Level and signs the corresponding annex.

b) It shall only expose access interfaces (e.g. RPC *endpoints* or APIs) and provide transaction reading or sending services to third parties under the terms and subject to the restrictions set out in **Policy INF1040 – Node Management Policy**, **Policy INF1050 – Policy on the management of digital identities, credentials and access**, and **Policy ADM1010 – Policy on Fees and Remuneration**.

c) You shall not connect your Execution Nodes to other systems or networks in a manner that breaches the segmentation measures, access controls and technical requirements defined in **Policy INF1040 – Node Management Policy**.

d) You shall refrain from modifying, decompiling or altering the ISBE client *software* installed on your Execution Nodes, its components, libraries or modules, as well as from developing, installing or using *plugins*, extensions or other mechanisms intended to manipulate, intercept or inspect the transactions or internal operation of said nodes beyond the capabilities and tools expressly authorised by the Managing Entity. Any update, version change or adjustment to the client software shall be carried out

exclusively in accordance with the instructions and procedures communicated by the Managing Entity.

The above limitations shall be deemed to be supplemented by those established, where applicable, by **Policy INF1040 – Node Management Policy** and the other applicable ISBE policies.

7. Financial conditions

The tariffs, fees, charges, compensation or any other financial conditions associated with the Execution Node Operator Level, including the possible use of such nodes to provide connectivity or access services to third parties, shall be governed entirely by the provisions **of Policy ADM1010 – Policy on Fees and Remuneration**, in its version in force at any given time.

8. Termination of the Execution Node Operator Level

Voluntary withdrawal, revocation or any other form of termination of the Execution Node Operator Level shall be governed by the provisions of the Framework Agreement and **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**, without prejudice to the operational consequences for Execution Nodes (including their shutdown, deregistration or deauthorisation) being in accordance with the provisions of **Policy INF1040 – Node Management Policy** and any other applicable ISBE Policies.

9. ISBE policies applicable to the Execution Node Operator Level

Code	Policy Name
NOR1020	Organisational Liability Policy
NOR1030	Code of Ethics
NOR1040	Conflict of Interest Policy

(The general clauses of the Framework Agreement continue to apply in all respects not expressly amended by this Annex)

Annex V – Specific Conditions for the Consensus Node Operator Level

1. Applicability

This annex shall apply where the Adhering Entity has signed the Framework Agreement and has been authorised to hold the **Consensus Node Operator** Level within the ISBE network, in accordance with **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem** and **Policy INF1040 – Node Management Policy**.

The possible combination of this Participation Level with other Participation Levels shall only be permitted where provided for in the ISBE Policies and where the requirements regarding functional segregation, independence and differentiation of equipment, procedures and infrastructure established by those policies **are met**.

2. Purpose of the Annex

To establish the specific conditions under which the Adhering Entity shall perform the Consensus Node Operator Level, considered critical to the security and operation of the ISBE network due to its involvement in the Consensus Protocol and the validation of transactions.

This Annex shall supplement the Framework Agreement by referring, in relation to technical commitments, service levels and, where applicable, financial compensation associated with the operation of the Consensus Node, to **the provisions** of the applicable ISBE Policies, in particular **Policy INF1040 – Node Management Policy** and **Policy ADM1010 – Policy on Fees and Remuneration**.

3. Accreditation as a Consensus Node Operator

In order for the Adhering Entity to qualify for the Consensus Node Operator Level, it must, in all cases:

a. meet the general requirements for admission **to** and continued membership of the ISBE ecosystem as set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**;

b. demonstrate sufficient technical capability and resources to operate a Consensus Node in accordance with the specifications of **Policy INF1040 – Node Management Policy** (including, but not limited to, hardware, connectivity and security requirements);

c. pass the technical, security and, where applicable, resilience tests provided for in **Policy INF1040 – Node Management Policy** and in the other applicable ISBE Policies; and

d. sign this annex, thereby formalising their commitment to operate the Consensus Node diligently and to comply with the operational guidelines issued by the Managing Entity in accordance with the ISBE Policies.

The Management Entity, once it has assessed compliance with the above requirements and depending on the needs of the ISBE network, may approve the inclusion of the

Adhering Entity into the set of authorised Consensus Nodes, in accordance with the provisions of **Policy INF1040 – Node Management Policy**.

The Managing Entity shall provide the Adhering Entity with the configuration elements, credentials and authorisations necessary for the Consensus Node to be recognised by the ISBE network, in accordance with **Policy INF1050 – Policy on the management of digital identities, credentials and access** and **Policy INF1040 – Node Management Policy**.

The specific conditions for joining the set of Consensus Nodes (including, where applicable, participation as an active or standby node and any applicable rotation schemes) shall be governed entirely by **Policy INF1040 – Node Management Policy** and other applicable ISBE Policies.

4. Obligations of the Consensus Node Operator

a. *Operation of the Consensus Node*: The Adhering Entity undertakes to operate its Consensus Node on a continuous basis and in accordance with the technical, hardware and cybersecurity specifications established from time to time by **Policy INF1040 – Node Management Policy**, maintaining a dedicated and appropriately certified operating environment.

b. *Availability and Performance*: The Adhering Entity shall maintain the levels of availability and performance defined in **Policy INF1040 – Node Management Policy**, including the service level agreements (SLAs) set out therein. To this end, it shall accept that the Managing Entity monitors the Consensus Node and records the necessary metrics, in accordance with **Policy INF1040 – Node Management Policy** and with the incident management procedures established therein under its internal policies.

c. *Active participation in the consensus*: The Adhering Entity shall act diligently in proposing and signing blocks under the Consensus Protocol in force, without introducing deliberate delays or unjustifiably rejecting the validation of transactions. Where maintenance tasks or other actions that temporarily affect its participation are necessary, the Adhering Entity shall coordinate this with the Managing Entity in accordance with the provisions of **Policy INF1040 – Node Management Policy**.

d. *Client software integrity*: The Adhering Entity shall refrain from modifying, decompiling or altering the ISBE client *software* deployed on the Consensus Node, its components, libraries or modules, as well as from developing, installing or using *plugins*, extensions or other mechanisms intended to manipulate, intercept or inspect transactions or the internal operation of the node beyond the capabilities and tools expressly authorised by the Managing Entity. Any update, version change or configuration adjustment to *the* client *software* shall be carried out exclusively in accordance with the deployment instructions and procedures communicated by the Managing Entity.

e. *Limitations and proper use*: The Adhering Entity shall use its Consensus Node exclusively for participation in the ISBE network's Consensus Protocol and, in particular:

a. It shall refrain from using it to deploy smart contracts or execute business logic other than that strictly necessary for said Consensus Protocol.

b. It shall not use it to serve general network read traffic or to expose public access interfaces, unless expressly provided for in **Policy INF1040 – Node Management Policy**.

c. It shall not connect it to corporate systems other than those strictly necessary for its monitoring, management and secure operation, in accordance with the terms set out in **Policy INF1040 – Node Management Policy**.

The Consensus Node must operate in a closed-network environment, communicating only with other authorised nodes on the ISBE network and with the Adhering Entity's own management and monitoring systems, as defined in **Policy INF1040 – Node Management Policy**.

The Consensus Node must remain deployed at the physical location and under the infrastructure conditions declared by the Adhering Entity and accepted by the Managing Entity, and must in all cases be located within one of the territories listed as authorised in **Policy INF1040 – Node Management Policy**. Any material change to the location or significant configuration of the Consensus Node shall comply with the notification, validation and approval procedures set out in that policy.

If the Adhering Entity wishes to temporarily or permanently cease the operation of its Consensus Node, it shall notify the Managing Entity in accordance with the notice period required by **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**, so that appropriate mitigation measures may be taken.

f. *Compliance with INF1040*: In general, the Adhering Entity **shall comply** with all applicable sections of **Policy INF1040 – Node Management Policy**, including updating the software to the **required** versions, applying the recommended security configurations, responding to monitoring alerts, and adhering to the procedures for deauthorisation and orderly removal of the Consensus Node where applicable.

g. *Collaboration with technical governance*: The Adhering Entity shall cooperate, to the extent reasonably practicable, with the Management Entity and the technical governance bodies in accordance with the terms set out in **Policy INF1040 – Node Management Policy** and any other applicable ISBE Policies, providing accurate information about its Consensus Node when requested for diagnostic, improvement or risk assessment purposes, and implementing without undue delay any configuration changes or urgent patches indicated for security reasons.

5. Remuneration and costs

The financial terms associated with the Consensus Node Operator Level, including, where applicable, any periodic payments that the Management Entity may grant to the Adhering Entity for the operation of its Consensus Node, shall be governed in full by the provisions of **Policy ADM1010 – Policy on Fees and Remuneration**, in the version in force at any given time.

Any financial compensation shall be subject to compliance with the service levels and other requirements set out in **Policy ADM1010 – Policy on Fees and Remuneration**, and failure to comply may result in reductions or the withdrawal of compensation or, where applicable, a review of the Participation Level itself in accordance with the Framework Agreement and **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

All costs associated with the installation, operation and maintenance of the Consensus Node (including, but not limited to, equipment, connectivity, energy, *cloud* services and human resources) shall be borne in full by the Adhering Entity. Any compensation that may be provided for in **Policy ADM1010 – Policy on Fees and Remuneration** shall be of a purely contributory nature and shall not guarantee full coverage of such costs.

Collaboration as a Consensus Node Operator shall be strictly of a civil or commercial nature and shall not imply the existence of any employment relationship between the Adhering Entity and the Managing Entity or with the other participants, the Adhering Entity being free to organise, under its sole responsibility, the technical and human resources it allocates to the operation of the Consensus Node.

6. Breach of SLAs and penalties

In the event that the Adhering Entity, in its capacity as a Consensus Node Operator, fails on a continuous or repeated basis to meet the levels of availability, performance or other service metrics established by **Policy INF1040 – Node Management Policy**, the Managing Entity may take the corrective, suspension or revocation measures regarding the Participation Level provided for in that policy and **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**.

Furthermore, the financial consequences arising from failure to meet these service levels, including the possible total or partial loss of compensation during the affected periods, **shall be governed** by the provisions of **Policy ADM1010 – Policy on Fees and Remuneration**.

7. Termination of the Consensus Node Operator Level

The Adhering Entity may request the termination of its Consensus Node Operator Level by notifying the Managing Entity, in accordance with the terms and notice period set out in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**. The termination of this annex shall not in itself entail the termination of the Framework Agreement or the loss of any other Participation Levels held by the Adhering Entity, unless the latter requests its complete withdrawal in accordance with that policy.

The Managing Entity may agree to terminate this annex where justified by changes to the model or configuration of the Consensus Protocol, a reduction in the number of Consensus Nodes, or any other circumstance provided for in **Policy ECO1010 – Policy on joining and leaving the ISBE ecosystem**, without prejudice to the possibility of proposing to the Adhering Entity that it remain in the network under other Levels of Participation that are compatible.

The Adhering Entity shall cooperate with the Management Entity in the orderly execution of the withdrawal of its Consensus Node and in the technical procedures associated with such

withdrawal, in accordance with **Policy INF1040 – Node Management Policy**. The financial and operational effects arising from termination, including the accrual and settlement of compensation up to the effective date of termination, shall be governed by **Policy ADM1010 – Policy on Fees and Remuneration**, **Policy ECO1010 – Policy on joining and leaving the ISBE Ecosystem,** and **Policy INF1040 – Node Management Policy**.

8. ISBE policies applicable to the Consensus Node Operator Level
